
Debrief: Findings, Recommendations, Next Steps

Neil Jacobs, Hendrik Tolman, Kevin Garrett, Chris Domanti, Maoyi Huang

UIFCW 2023

A UFS Collaboration Powered by **EPIC**

Take-aways

- What we do saves life and properties.
 - Similar to the legacy of moon landing a few decades ago, a legacy is inspiring this generation to advance science and technology.
 - Our legacy: To understand and take actions to make our own planet sustainable for generations to come.
- UFS needs diverse Superheroes. Diversity and innovation are intertwined and essential to one another.
 - UFS have evolved to a community modeling system that can enable not only operational weather modeling but also process level modeling/analyses.
 - Government, academia, and private sector should co-design its future.
 - Emerging technologies/applications can help accelerate innovation
- As a community, we have the responsibility to help people see and realize their dreams.
 - Made progress but more can be done
- EPIC's mission is to be the web to connect all the parts.
